

THINKING BUSINESS SOLUTIONS

4

BUSINESS

INTERNATIONAL TRADE SERVICES

OVERVIEW

4 Business has extensive operational knowledge of trade and protocols – particularly in Europe, the Middle East, USA, the Indian sub-continent and Asia.

We provide businesses with high-quality, integrated trade services including invoicing, VAT, banking, processing of documentary credits, liaison with inspection organisations and freight forwarders, financial management and accounting.

Our many years of experience and a hands-on approach have led us to develop streamlined processes for trade billings and invoicing, shipping and insurance, and attending to customs' clearance for importers and exporters.

TRADE SERVICES

Start-up Trading Businesses

If you are an entrepreneur, you can create an efficient low-risk trading business by outsourcing your back office – giving you full control of your business rather than entrusting this to a shipping agent or third party. We can help you set up your company and trading operation and our trade services division will follow up with full support when and where it is needed – keeping your costs low and predictable.

Existing Importer/Manufacturer

For an existing importer/manufacturer of products for home markets (through your retailers or distributors, or perhaps large retail chains in North America, Europe or the Pacific Rim), 4 Business can implement a structure to purchase direct from the supplier through your offshore trading company. We act on behalf of your company with your goals and needs in mind – providing all the resources for shipping and trade transactions, as well as banking and administration – leaving you with much lower overheads and greater flexibility.

Existing Foreign Business

For established businesses that need to source suppliers

and business and government contacts, 4 Business can connect you to the resources you need. We can also assist with creating and facilitating your market-entry strategy in Europe and Asia.

Trading with China

With a population of over 1.3 billion, China is the world's biggest potential market and clearly the 'factory of the world'. Although China is a full member of the WTO, there are still some barriers to foreigners (both real and perceived) in doing business there – not least of which are culture, language and time-zone differences between your home country and global target markets.

4 Business' trade services provide new and existing businesses with full support and guidance in both Hong Kong and China's daunting and complex business environments.

Trading with Europe

The European Union is a densely populated, culturally diverse union of 27 Member States. The current population is 490 million and increasing rapidly.

The EU Member States now represent the largest trading block in the world. External imports and exports are in excess of USD 1 trillion dollars – giving rise to immense opportunities for entrepreneurs and businesses generally.

4 Business' European office network offers a comprehensive range of services including business start-up services, trade services, and full support services – utilising all of the major European languages.

How can we help?

- 4 Business can extend your business contacts and relationships;
- create and maintain an efficient and cost-effective trading operation in Europe and Asia;
- take care of your back-office functions allowing you to focus on growing your business;
- provide assistance with the opening and operation of bank accounts;
- assist with cash management and debt recovery;
- handle documentary credits and other trading Instruments;
- assist with VAT registration and management;
- provide Escrow services;
- ensure timely and accurate information on your business for banking, accounting, financial reporting and shipping; and
- give you increased control and flexibility over your operations to help you reduce risk and high set-up costs.
